

THE FUTURE OF SHIPBUILDING AND SUSTAINMENT IS DIGITAL

Today's digital investment is creating the secure infrastructure, data integration, processes, tools, and proficiency needed to **use digital capabilities to build ships more efficiently.**

Future digital value includes continued **construction savings** for the rest of the **Ford-Class, and the life cycle benefit of** more efficient maintenance and modernization.

Ultimately the use of digital tools throughout the ships life will prepare tomorrow's workforce to deliver **more operational availability with less cost.**

THE DIGITAL INVESTMENT IN ACTION

"ADVANCING OUR DIGITAL ADVANTAGE REQUIRES AN ENTERPRISE MIND-SET ACROSS EVERY FACET OF OUR BUSINESS. Successful digital transformation requires development and integration of a wide-range of capabilities to improve performance, unlock new opportunities, drive innovation, deliver new efficiencies, and inform analytic-based decision-making."

Chief of Naval Operations, Admiral Michael M. Gilday,
